

XClean is our complete cleaning management solution, designed to the National Standards of Healthcare Cleanliness. Incredibly simple to use, it optimises the process of both scheduling cleans and monitoring cleanliness within a healthcare environment. A fully integrated suite of reports provides trend analysis with drill-down capabilities to monitor areas, zones, rooms, departments and other areas of concern.

#### **Cleaning Audits**

Users can carry out mandatory, element-based cleaning audits at ward and room levels. Rectifications are sent directly back to the ward/ estate teams linked to action plans. Following audits, each location is given a rating that is automatically converted to a star rating that can be printed or displayed digitally.

#### **Cleaning Scheduler**

Schedule in planned cleans, rectification cleans following an audit or rapid response cleans following an emergency. Removes the need for paper cleaning schedules and can be linked to QR code check-in and time and attendance plans.

#### **Time to Clean**

The Time to Clean feature gives Domestic Services and Cleaning providers the opportunity to accurately measure the required cleaning hours for a given area based on risk, frequency and specific elements cleaned.

#### **Dynamic Room Memory Storage**

A unique feature that remembers room elements for each audit. So, if a room doesn't have a sink, the system will remember this the next time the room is audited.

#### **Rapid Response Cleaning**

The system optimises patient flow by utilising dynamic cleaning task management. It will assign and notify cleaners if a ward or area needs an emergency clean.

+ many other features designed to save time and improve patient satisfaction.

- ✓ **Demonstrates compliance with IPC and National Standards of Cleanliness**
- ✓ **Improves staff efficiency**
- ✓ **Quickly resolves any issues**
- ✓ **Optimises patient flow**

Reduce, improve, track, and move.  
**Realise More with Synbiotix.**

Synbiotix 

“Working with Synbiotix has been an absolute game-changer for us. We’ve experienced a remarkable improvement in our workflows and service delivery. Streamlining tasks and accessing real-time data has enabled us to serve our patients and clinical colleagues better”

**Rhys Stevens**

Soft FM Systems & Solutions Manager, Barts Health NHS Trust
