

At Synbiotix, our motto, realise more isn't just a statement - It's our commitment to delivering intuitive, efficient and impactful solutions. We streamline operations and empower healthcare teams to focus on what matters most.

How Synbiotix Helps You to Realise More

Complete Digital Oversight

Synbiotix provides a fully integrated digital platform for managing all total facilities management services - including helpdesk, portering, cleaning, and maintenance - providing full visibility from a single system.

Real-Time Task Management

Our system enables real-time task allocation, tracking, and escalation, ensuring teams are always deployed effectively and service levels are maintained. All tasks are linked to SLAs, providing transparent and measurable outcomes.

Intelligent Resource Utilisation

Using smart data and RTLS (real-time location systems) integration through our partnership with a leading provider, Synbiotix optimises the allocation of resources such as porters, cleaners and equipment, ensuring maximum efficiency.

Seamless Integration

Our platform integrates easily with existing systems including: PAS, EPR, BMS, CAFM, Finance and HR to provide a connected ecosystem without the need for disruptive replacements.

IoT-Enabled Automation

With IoT sensors and devices integrated into the platform, Synbiotix enables automatic task generation based on live environmental data (e.g. occupancy levels, temperature, air quality, asset usage), improving responsiveness and reducing manual interventions.

Unleash the Power of Unified Facilities Management

Catering - Improve patient satisfaction with bedside ordering. Features include: nutritional analysis, product management, digital HACCP and efficient stock management.

Cleaning - Optimise cleanliness with QR Code check-ins and rapid response cleans, trends analysis and drill down capabilities to monitor areas, zones, rooms, departments and other critical areas. Compliant with the National Standards of Healthcare Cleanliness.

Task Management - Enhance patient flow with intelligent task allocation and real-time updates. Alongside portering it can also encompass; domestic rapid response, HPV, pest control, linen, catering, car parking, patient transport and security.

Maintenance - Ensures operational uptime with preventative maintenance linked to SLA's and compliance tracking

Audit - Customise audits and monitor progress with ease, online or offline.

Achieve More Today

Discover how Synbiotix helps you realise more by reducing complexity, enhancing performance and driving transformative results.

- ✓ Exceeds Compliance Standards
- ✓ Improves efficiency
- ✓ Optimises patient flow and experience

Reduce, improve, track, and move.
Realise More with Synbiotix.

Synbiotix^x

"Working with Synbiotix has been an absolute game-changer for us. We've experienced a remarkable improvement in our workflows and service delivery. Streamlining tasks and accessing real-time data has enabled us to serve our patients and clinical colleagues better"

Rhys Stevens

Soft FM Systems & Solutions Manager, Barts Health NHS Trust
